

JubileeScape

ENSURING OUR CLIENTS MAKE THE BEST POSSIBLE IMPRESSION IS THE EVERYDAY GOAL FOR JUBILEESCAPE. WE PROVIDE EXCEPTIONAL LANDSCAPE CONSTRUCTION AND MAINTENANCE FOR HOMES AND BUSINESSES ACROSS THE GULF COAST.

What does your business offer for someone planning a renovation?

Courtyards and landscape lighting are a growing niche for us. Our design team is all about creative solutions. With the Pelican Coast courtyard pictured here, we were careful to preserve a mature mulberry tree, and mixed oyster shells in the concrete for a pleasing texture to fit the organization's environmental mission. We even secured a bronze pelican sculpture to finish off the water feature. It's important to listen and understand that every project is completely different.

How do you make sure clients get the best results?

Attention to detail and immediate follow-up are core values. We use an app called Sitefotos that allows our technicians in the field to snap an image when they spot a problem and send it immediately to a supervisor for a quick diagnosis and treatment plan.

How has your business grown or changed and where are you going from here?

Along with Mobile's economy, we see growth in commercial projects. That development also means more challenges with erosion, drainage and water management — and we're expanding credentials to ensure we're ready.

How did you get into the field?

Running a cemetery business for years meant managing the grounds nearly as much as the services. Transitioning into the landscape business was a natural move.

What makes yours a quintessential Mobile business?

I've grown up on Mobile Bay along with much of our team. We understand very deeply the impact of our business on the environment. This isn't just a branch office of a big operation ... it's home.
